

Prokuro Subscription Pricing v1.2 — Revised Decision Brief

Date: 2026-08-15 · Status: **LOCKED (V1.2)** · Self-serve prices unchanged: Growth \$149 / Scale \$399.

1. Direct answers (why this revision exists)

Yes — enable purchase on Free. There is no good demerit. Blocking buy was an old upgrade wedge. A hardware buyer who cannot try purchasing does not feel the product. Abuse is quote-scraping, not “they placed two Digi-Key orders.” Cap Free at 5 purchasing actions / month (max 2 orders when ordering is on). Paid gets 40 / 200. Flip can_purchase to true on Free. Today’s deploy still has Digi-Key ordering off — Free can use the quote path when it is live; orders inherit the same cap later.

Yes — ship an Enterprise sales plan for OEMs above Scale. v1/v1.1 hid this as “off the public grid.” That reads as “we don’t sell to large companies.” Enterprise is a real fourth offer: custom annual, invoice, SSO, limits above Scale. Not a Stripe self-serve SKU.

We do not delete data. v1 said 14-day Free delete. v1.1 changed the policy to keep-forever but still labeled a table row like “retention,” which looked unchanged. v1.2: there is no retention/delete policy. BOMs and MPN snapshots stay in S3/Dynamo. What differs by tier is *how often we refresh* (Free weekly, paid daily, Enterprise daily + priority). Extra BOMs stay stored; they just drop out of the monitored set.

2. Four offers

FREE \$0 Purchase on · 5 actions/mo One board, analyst, weekly refresh, try buying. Data kept. Upgrade = daily monitoring + volume.	GROWTH \$149/mo \$1,490/yr · Stripe Working buyer. 10 live boards, daily refresh, Bedrock on, 40 purchase actions.	SCALE \$399/mo \$3,990/yr · Stripe Small procurement desk. 50 live boards, daily refresh, 200 purchase actions.	ENTERPRISE Custom Annual contract · sales OEM / EMS above Scale. SSO, invoice, SLA, custom BOM and API budgets. Not in Stripe Checkout.
--	---	--	--

Public self-serve grid: Free / Growth / Scale. Enterprise is on the same page as “Contact sales” — not hidden, not a fourth self-serve price. Packaging remains live BOMs + line/analysis caps. Seats are a ceiling. No metered overages. Do not headline “quotes/mo” until buying UX ships; enforce a single purchasing-actions pool internally.

LIMIT	FREE	GROWTH	SCALE	ENTERPRISE
Price	\$0	\$149/mo	\$399/mo	Custom annual
Seats (ceiling)	1	2	5	25+
Active BOMs (refreshed)	1	10	50	200+
Max lines / BOM	100	500	2,000	10,000+
BOM lines / month	300	2,500	15,000	100,000+
Analyses / month	3	20	100	Custom
Purchasing actions / month	5	40	200	Custom
max orders (when ordering on)	2	10	50	Custom
can_purchase	true	true	true	true
Store BOMs + MPNs	forever	forever	forever	forever
Availability refresh	weekly	daily	daily	daily + priority
Delete after N days	no	no	no	no
Concurrent analyses	1	1	3	Custom
New unique MPN lookups / day	200	1,000	5,000	Custom
Bedrock	Haiku, capped	On	On	On + higher budget
SSO / SLA / invoice	no	no	no	yes

lines/month = sum of lines in each analysis (re-analyze counts). Active BOM = in the refreshed set. Boards above that stay stored, not refreshed, until swapped in or upgraded. Purchasing action = quote or order call. Ordering is off in current deploy (DIGIKEY_ORDERING_ENABLED=false); the order sub-cap is dormant until that flag is on. Enterprise floor is above Scale (\$3,990/yr); typical shape is annual invoice, NET-30, DPA, named onboarding. No public dollar — sales quotes. Not created as a Stripe Checkout price.

3. Free purchase — why there is no demerit

Cost: Digi-Key/Mouser lookups are quota, not cash. Five actions/month cannot move AWS. Conversion: trying a real buy is stronger than a locked button. Support: fewer “why can’t I purchase on Free?” tickets. Remaining risk is scraping — 5 actions + 1 org/domain + work email stops farms. If Free purchasing-action 402s spike with zero analyses, tighten to 3, don’t flip the boolean back off.

4. Enterprise sales plan

Who: 25+ people in procurement/engineering, 200+ live BOMs, or SSO/security review. How sold: website “Contact sales,” not Checkout. Commercial: custom annual, invoice, floor above Scale. Product: everything in Scale plus custom line/BOM/API budgets, daily+priority refresh, higher Bedrock budget, SSO, SLA, DPA, audit log. Implementation: plan=enterprise set by ops/Stripe Billing (invoice) or a flag on the billing Dynamo item — no fourth self-serve price ID. App treats unknown high entitlements as Enterprise, not Free.

5. Data policy (not “retention”)

Keep all account BOMs and all MPN snapshots. Do not TTL-delete for plan or inactivity. Build the component network. Daily job refreshes paid active-BOM MPNs first, then leftover Digi-Key quota for catalog freshness, then Free’s weekly 1-BOM pass. Stale Free UI: banner, data still there. Cancel/downgrade: keep files, drop to Free refresh + 5 purchase actions. S3: expire *noncurrent versions* at 30 days only (cost hygiene), never the current BOM.

6. Digi-Key 50,000/day · 480/min

Contract on billing@prokuro.ai. Code still has 1,000/day and 120/min in `rate_limit.rs` — update that first. Global Free intake 5,000/day (10% of 50k). Per-account new MPN/day: Free 200, Growth 1,000, Scale 5,000, Enterprise custom.

7. Bedrock

Growth, Scale, Enterprise: on (Haiku default). Free: Haiku only, no recursive alternates, inside 3 analyses / 300 lines, max 50k tokens/analysis. Do not run Sonnet on every line. Alarm Bedrock spend.

8. Cost snapshot (order of magnitude, USD)

Lights-on ~\$50–100/mo (base ~\$70). One Growth covers baseline. Free purchase does not change that. Bedrock on paid is the new variable (~\$8–12 Growth, ~\$30–50 busy Scale). Mix below is self-serve only (50/40/10 Free/Growth/Scale). Enterprise is upside on top, not in this table.

N SELF-SERVE ACCOUNTS	REVENUE	INFRA+BEDROCK	STRIPE	CONTRIBUTION	MARGIN
10	\$996	~\$120	~\$30	~\$850	~85%
50	\$4,975	~\$350	~\$154	~\$4,470	~90%
200	\$19,900	~\$1,200	~\$617	~\$18,100	~91%
1,000	\$99,500	~\$6,000	~\$3,055	~\$90,400	~91%

9. Stripe + entitlements

Keep: Growth price_1U4Mrn6OM1R4nep11h3o5N5N (\$149); Scale price_1U4MsS6OM1R4nep1VdxKcCPb (\$399).
Create: growth_annual \$1,490; scale_annual \$3,990. **Do not create** Free or Enterprise Checkout prices. Free = default. Enterprise = sales invoice / Billing, plan=enterprise on the Dynamo row. Change status_from_record: stop tying can_purchase to “not Free.”

```
{
  "free":      { "can_purchase": true, "purchasing_actions_per_month": 5, "orders_per_month": 2, "active_boms": 1, "max_lines_
"growth":    { "can_purchase": true, "purchasing_actions_per_month": 40, "orders_per_month": 10, "active_boms": 10, "max_lines_
"scale":     { "can_purchase": true, "purchasing_actions_per_month": 200, "orders_per_month": 50, "active_boms": 50, "max_lines_
"enterprise": { "can_purchase": true, "purchasing_actions_per_month": null, "orders_per_month": null, "active_boms": 200, "max_line
}
```

null = custom, set on the contract. global_free_digikey_per_day = 5000.

10. Ship order

- 1. Rate limiter 50,000/day · 480/min (code is still 1k/120).
- 2. Entitlements + 402s. Free can_purchase=true with 5-action cap. Keep all data. Weekly Free / daily paid refresh. Bedrock on paid; Haiku-capped Free.
- 3. BillingPlan::Enterprise (ops-set). Website: three self-serve cards + Contact sales.
- 4. Annual Stripe prices + checkout interval.
- 5. Do not advertise Free until 1–2 are live.

11. 30-day metrics and red flags

Counters

- Free → paid among Free with ≥ 1 analysis (target $\geq 8\%$)
- 402s by cap (lines, analyses, purchasing actions)
- Free purchasing actions with 0 analyses (scrape signal)
- Stale-banner → Growth checkout
- Enterprise demo requests vs self-serve
- AWS bill vs ~\$70; Bedrock \$; Digi-Key 429s

Red flags

Tighten Free actions immediately if scrape farms, Digi-Key 429s starve paid sync, or bill $> \$150$ with < 20 paid. Do not turn can_purchase back off. **Raise self-serve price** only after 30 days if conversion $> 25\%$ and paid users $> 80\%$ of caps. If conversion $< 5\%$, tighten Free volume/refresh copy, not dollars.

Locked v1.2. Free can buy (5 actions). Data is never deleted for plan reasons. Enterprise is a sales-led fourth offer. Growth \$149 and Scale \$399 unchanged.
